

AC Develop adds value

AC Develop has worked hard at adding more value to what you currently experience on the system and here is how...

Document Library

This addition is ideal for UMA's and Broker Houses to host relevant material for users, to access regular documents for client meetings, such as:

- Proposal Forms
- Fact sheets
- Disclosure notices
- Current Newsletters
- Legal Notices or
- Brochures

Updated forms or content can be loaded at any time to ensure that only the most recent documents and relevant notices and news is available.

External CPD Certificates

CPD certificates of staff from other providers may be uploaded for a central CPD report solution. For example, if someone has completed the FA News reading content and would like that CPD certificate to be recorded on the system, we can now accommodate this. The only condition is that this certificate must relate to the current CPD cycle.

This means that your company's full CPD reporting can be available from a single source.

Unique Certificates per Module

Each module can have its own unique certificate, for example:

1. If you need a specific module for your internal staff to complete and be recorded on the system, we can accommodate targeted modules with unique certificates.
2. Clients who have their own site with AC Develop and offer modules with content sponsors can provide a customised certificate unique to each module to give the sponsors more visibility.
