

DEVELOP

Our minds naturally seek to **learn, understand and develop**. Throughout our years in business we have always been encouraged to keep up-to-date with trends and risks in our industry. Our inboxes are always full of materials to read and content to consume, irrespective of the platform it is delivered on. Much of this content is useful to us and can provide us with more than just another hour of reading as this is the baseline definition of **CPD – Continuous Professional Development**.

AC Develop provides a platform which offers you audio, visual and face-to-face content, and records your participation by means of a verifiable assessment that confirms our understanding and records your CPD.

Product Suppliers of insurance, UMAs, NMLs and employers can also participate in this platform to provide and record the required Product Specific Training with an option for CPD for brokers and staff.

AC Develop's web-based CPD Library provides clients with access to online activities that will enable more than the 18 hours of CPD required by the FSCA to be achieved. It will include:

- Legislative update activities
- HR guidance and Soft Skills
- Insurance Technical activities in Short-Term generalist and
- Specialist insurance areas, including:
Trade Credit, Marine, Aviation, Agri, Engineering,
Guarantees/Bonds, and Liability, etc.

Our Library provides a range of activities from online to events, so that everyone has a choice of activities best suited to their work environment. We also cater for content which is relevant to Key Individuals and Representatives. All activities are CPD approved with the FPI.

Our Client Offering:

This cost effective package is ideal for Financial Service Providers and their staff to access and complete CPD activities to fulfil their regulatory and/or Professional Body requirements.
